

Drug Assistant

Indigent drug recovery

HIPAA Privacy Policy

*****The following notice gives detail to the manner in which all of the health information for your patients will be managed by Drug Assistant, LLC.*****

Security:

Drug Assistant, LLC uses 256-bit encryption (the strongest SSL protection currently available) The Secure Sockets Layer (SSL) is a commonly-used protocol for managing the security of a message transmission on the Internet. SSL works by using a private key to encrypt data that's transferred over the SSL connection SSL is included as part of both the Microsoft and Netscape browsers and most Web server products. Developed by Netscape, SSL also gained the support of Microsoft and other Internet client/server developers as well and became the de facto standard. Passwords are secure and are only known to the end user.

Treatment:

We will not exchange information entered by your personnel for any purpose not related to patient assistance. The information obtained from you or from other providers will become part of your medical records.

*****Other uses and disclosures not requiring prior authorization*****

Legally Required Disclosures & Public Health:

We may disclose PHI as required by law, or in a variety of circumstances authorized by federal or state law.

Law Enforcement & Subpoenas:

We may disclose PHI to law enforcement such as limited information for identification and location purposes. We may also disclose PHI to others as required by court or administrative order, or in response to a valid summons or subpoena.
